BIGGER CUT IN STATE RINGET

Leaders Hear Stassen's Report, Propose Cut of Another \$3.000.000.

Rockne Says Savings Can Be Made by Reducing Aid

to Schools.

Text of Governor Stassen's Budget Message Is on Page 14.

By Orlin Folwick.

Tribune Staff Writer.³ Legislative leaders who heard Governor Stassen call for a \$3,-000,000 slash in the biennial state budget Wednesday looked to the possibility of exceeding the governor's plan by cutting an additional \$2,000,000 to \$3,000,000.

put the state "upon a sound financial basis for the first time in many years," suggested that the allowance for the next two years be a net of \$79,300,823 as against the \$82,-340,195 granted two years ago. But Senator A. J. Rockne of Zum-

brota, chairman of the senate finance committee, said in his opinion the legislature can go still further in economizing, chiefly by reducing supplemental aids to the schools.

The governor, in his message, recommended continuance of these payments on the same basis as for the last two years, totaling \$36,-382,992 for the coming biennium.

"That calls for a little better than \$18,000,000 a year," Senator Rockne commented. "It means that Minnesota is giving its school systems more than twice as much aid as the states of Wisconsin and Iowa together, Wisconsin giving \$7,-892,000 a year and Iowa, \$400,000.

"Without creating any hardships in the districts that need state aid the legislature can make some heavy savings. The supplemental aid law was intended to help out thdse districts where difficulty was being experienced in paying the cost of education. As it is being worked out now, it is being paid out indiscriminately. We fixed a

LONDON, PARIS ARE JUBILANT

Industrial, Technical Aid May Shift Balance of Power.

London, Feb. 1. - (INS) -President Roosevelt has tac-The governor, urging action to itly agreed to an Anglo-American-French industrial and technical alliance in a momentous secret move to swing the balance of air might back to Europe's democracies, it was learned Wednesday night from one of Britain's highest government authorities.

Through this three-way agreement-aimed directly at Germany and Italy-Mr. Roosevelt has paved the way for Britain and France to purchase the finest and most formidable Américan warplanes.

Germany Furious.

The two European nations also will be enabled to take advantage of America's vast industrial capacity and its technical and metallurgical resources in order to overcome German-Italian air 'strength which terrorized Anglo - French statesmen before the Munich pact.

British government circles are quietly jubilant over the American President's commitment to aid the democracies resist encroachments of totalitarian states.

While German officialdom and its inspired press are openly furious, day morning to hear furt the British foreign office has remained silent over this development which bids fair to change the picture of international affairs.

But behind the barrage of Nazi press altacks against the President of the United States, there is also a section of German government of the United States, there is also a section of German government

30-mill school tax rate as the basis for granting aid, that is, when a district had to levy as high a tax as that to pay its maintenance costs, we felt the state should step in and help.

Criticizes Expenditures.

"Instead of being confined to that kind of help, however, school officials in many districts are putting their bonded indebtedness into their operating costs so that they can bring the levy up \ and collect large sums of money from the state. In one instance we know that a district took the supplemental aid funds and spent it for electric lights on a football field. We thought this money was to be used for paying teachers and buying books and fuel."

Senator Rockne said he is in favor of giving all possible aid to districts that need the assistance, but not to those "that can take care of themselves." He explained also that his plan to cut the supplemental aids would not affect the \$10 per pupil distribution from the income tax revenue."

Senator Rockne said that supplemental aids total about \$7,000,-000 a year and that by compelling the state department of education to follow the intent of the law in supplemental aid to confining needy districts only, this expense could be cut nearly in half.

Reduce F.-L. Quota.

In describing his budget plans to the legislature, Governor Stassen said that all departmental budgets were cut below the amounts allowed in the spending program set up by the Farmer-Labor administration-\$88.000.000 of appropriations and some \$10,000,000 additional that departments receive in fees and special revenues. New accounting methods have been introduced to provide an accurate picture of all departmental finances, he said.

The governor said that a balanced budget can be achieved even though his plan of spending would be \$4,495,000 greater than an-

ticipated tax revenues. To make up this shortage, he urged the legislature to continue the 10 per cent taxes, cutting out 1.33 mills levied versity of Minnesota and soldiers' relief, and charging departments a 5 per cent fee for handling their budgets.

Other Proposals.

Other major recommendations in the message were:

Cutting the highway department allowance .for maintenance from \$11,679,000 a year to \$6,000,000.

A \$4,500,000 bond issue to pay off the deficits left by the Farmer+ Labor administration. The bond is sue would be known as the "Farmer-Labor deficiency bond issue,' the governor said.

Use of \$10,000,000 of now idle state trust funds to finance a relief bond issue at 11/2 per cent interest

Rentention of the 4-cent gasoline tax to replenish state highway funds and take up a \$1,625,236 deficit.

Reduction by \$9,000,000 of the state debt, from \$132,883,045 to \$123,774,951.

Creation of a \$300,000 contingent fund to meet special needs that cannot be provided for in the budget.

Pledges Strict Account.

Assuring the legislators that the strictest type of accounting will be invoked throughout his administration, Governor Stassen said he looks hopefully toward an era of "renewed commercial activity within the state, resulting in more jobs for our unemployed, avoidance of new tax burdens on real estate and placing upon business and enterprise any additional burdens."
